This study aims to elaborate a draft of a cadastral data standards for Morocco, including the structure, content, coordinate reference system, quality, presentation, metadata, and mainly data exchanging, based on Internationals Standards. Right now, I have read enough about several experiences of foreigners countries and I figured out the contrast with the situation in Morocco, where I work in Land Registry and Cadastre field since 1994.

Keywords Morocco, Land Registry, Cadastre, Data, GML, ISO 19152
